RETRO MINIMALISM

The project keeps things simple, focusing on functionality and a warm, inviting vibe. The design goes for clean lines, neutral colours, and natural materials like wood, jute and linens to create a calming, cosy atmosphere. Using plenty of natural light and understated but stylish lighting fixtures helps highlight the beauty of the space while giving it a warm, welcoming feel. The furniture is all about functional designs that are super comfortable and practical.

Overall, the design achieves a chill, relaxing environment that just works on a practical level but also looks and feels inviting and harmonious.

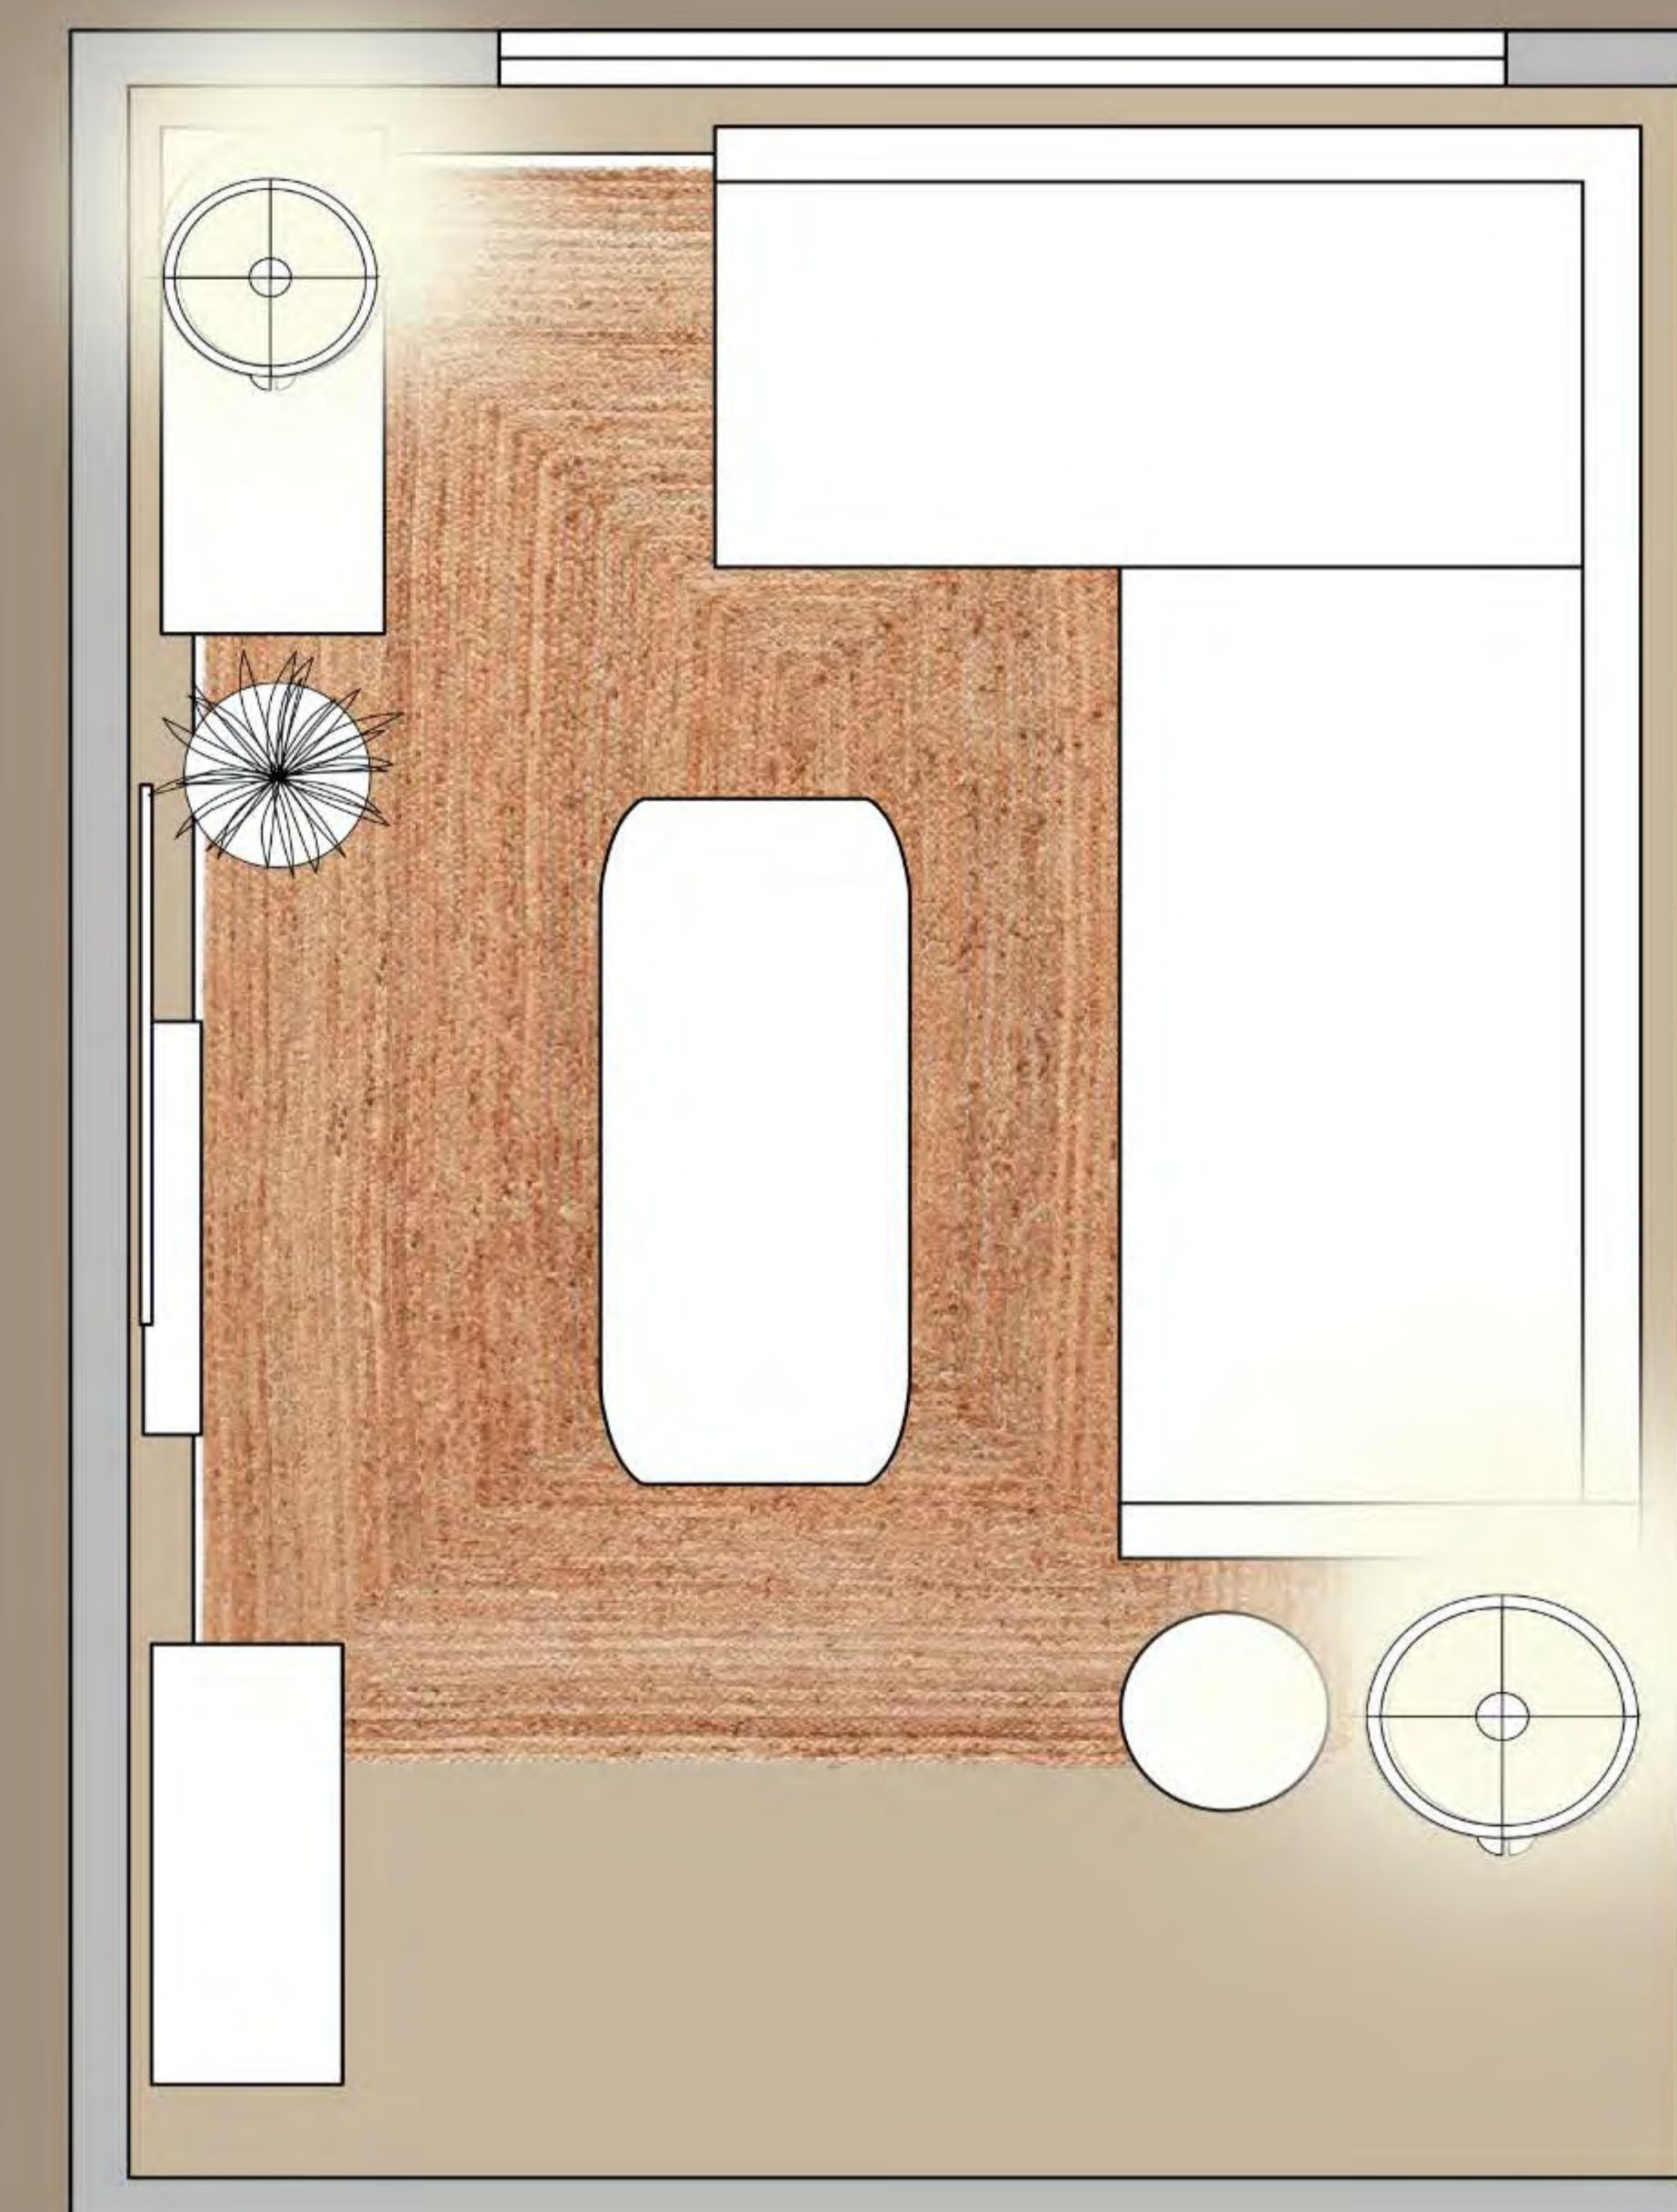

MATERIALS:

Incorporating materials like rich dark woods and tactile linens brings warmth and texture to the space, while touches of black or deeper shades create contrast and depth against lighter sandy tones.
